

THE SOILVIEW™ INTENSIVE SAMPLE SYSTEM

A SOUND INVESTMENT

THE SOILVIEW™ SAMPLING SYSTEM PROVIDES...

- Equal distance grid patterns
- Sample point locations adjusted for infield boundaries & field obstacles
- 10-12 quality soil cores per sample as proven by university research
- Samplers trained in technique with custom-fit probes to ensure correct core depth control
- The expanded center point pattern enlarges the sample area within the grid minimizing nutrient spikes
- SoilView's sample tracking verifies every field
- SoilView's Command Center transfers completed field data and updates field status in real time.

Reliable results through the quality standards and assurance methods of SoilView
