AgVision®
Agribusiness Software

ACCOUNTABILITY. PROFITABILITY. EFFICIENCY.

Accounting & Inventory Management Software

GRAIN, FEED, FERTILIZER, CHEMICALS, SEED

agvision.com

AgVision® is the right choice.

Comprehensive, flexible, easy to use. We listen, adapt, and are all about helping you.

Choosing business management software for your agribusiness or cooperative is an important decision. The software must be comprehensive enough to handle complex transactions, yet flexible enough to meet the expectations of your customers, directors, and regulators.

AgVision has been developing and supporting quality, market-proven accounting, inventory and technology solutions since 1976. We tailor our work to your needs in an ever-challenging marketplace governed by a myriad of laws and regulations. Instead of programming code and selling you a system that we think you need, we listen, learn, adapt and develop solutions that you tell us you want.

We then support our products with knowledgeable people who care. Our family-owned business represents four generations of accounting, business, technology, and agricultural experience. Our purpose is to help your business prosper and be a leader in the agribusiness industry.

AgVision® Solutions

COMMODITY MANAGER FOR GRAIN
Manage multiple commodities from purchase to sale. Create, track, and print contracts, scale tickets, splits, bills of lading, warehouse receipts and shipments. Produce daily, monthly and annual position records. Track basis, margins, and risk exposure, settlement sheets and proof of yield reports, and advanced, deferred and progress payments. Pay by check or ACH. Manage transfers and direct shipments, unlimited grade factors, various storage rates, traceability requirements, and multiple bins at many locations.

COMMODITY MANAGER FOR SEED AND TREE NUTS
Purchase, receive, process, monitor inventory and ship. Create sales and purchase contracts, pay growers, track inventory by traits, variety, lots, and sorting requirements. Process and package your commodity. Produce documentation for inspectors and for domestic and international shipping.

COMMODITY MANAGER SCALE INTERFACE
Decrease load-handling time with a live or Stand-alone Scale Interface (SAS) at remote locations that might not have reliable internet service. NTEP-Certified. An RFID option is available for attended and unattended scales. Tickets can be printed, emailed, texted, sent to AgVisionAnytime.com, and they can be shared with other systems or supply chain partners.

## FINANCIAL ACCOUNTING AND FEED
Manage Accounts Receivable. Apply Bookings and Prepaids. Features included: Point of Sale, Inventory, General Ledger, Disbursements, Sales History, Accounts Payable, Sales Commission, Payroll and Patron Equity. Apply splits, book products to specific sales, lot-track regulated medications, and ingredients. Blend, and then invoice for both manufactured and custom feed mixes. Interface to multiple feed mixer controls. Apply Grain Bank to feed orders.

FERTILIZER MANAGER
Measure your agronomy department's profitability. Formulate, mix, invoice, and record sales of liquid and dry fertilizers and services. Send/receive orders to and from fertilizer blenders. Create blends based on soil test recommendations and least-cost calculations. Adjust ingredients proportional to actual weights. Split invoices among customers with varying percentages. Use prepaid dollars and booking contracts. Calculate application fees, delivery charges, taxes, services. Store history, crop year, maps, statements, and restricted chemical usage reports. Exchange information electronically with your growers, precision ag systems and supply chain partners.

EQUIPMENT, NETWORKS, CONSULTING
Let AgVision take care of your hardware and networking requirements. From conception to support, we stand behind our products and services.

AGVISIONANYTIME.COM
is designed for desktops, tablets and smart phones. The web portal includes grain, financial, agronomy, and other data, information and reports for your producers. It also has CRM tools for group and targeted mailings.

Software for Rural America

Modern agribusiness is technology driven. In an instant, you have to know your financial business position, what inventory is on hand to manufacture, process or sell, and how to trace every item from its source to destination. Meanwhile, customers and vendors are asking for more access to data.

AgVision offers solutions to these challenges. With AgVision, you can chart your financial position, create orders, sales and purchase contracts, apply bookings and prepaid dollars, split settlements, and create payments. You can control the exchange of your data and maintain your financial privacy.

Professional Installation, Training and Support

We install AgVision software on business-class computers that we sell and support as well as on third-party hardware. We support a variety of Microsoft® Windows operating systems and networks. Plus, we offer hosted and technical consulting services.

Software training is available in our classroom, at your business, and via the internet. We customize each class to your business model and use both the classroom and your data to assist your learning. Review and advanced classes are available. Our goal is for you to be comfortable using our software quickly so your system is running smoothly according to schedule.

Outstanding support has made AgVision an industry leader. We are committed to making your AgVision experience pleasant and beneficial. With support via the telephone, Internet, or at your office, we are there for you. During peak business periods, such as harvest, we work extended hours so you can better serve your customers.
